

Omkar Sangote

Bengaluru, Karnataka | +91-9513083542 | omkar.sangote@gmail.com

Summary

Results-driven Software Engineer with over 2 years of experience in software development and testing, specializing in building robust CI/CD frameworks and delivering high-quality, reliable solutions. Proficient in Go, C/C++, and scripting languages, with a strong background in network protocols (TCP/IP, SMTP) and Linux environments. Proven ability to diagnose and resolve critical issues, lead platform migrations, and collaborate effectively with cross-functional teams. Seeking a challenging role to leverage technical expertise and contribute to organizational growth.

Experience

Software Engineer | Barracuda Networks • Bengaluru, Karnataka *September 2022 – Present*

- Developed and enhanced CI/CD frameworks from scratch for firmware development, ensuring seamless deployment and full development lifecycle support.
- Contributed to significant code rewrites in Go and developed new features for Email Security Gateway firmware, enhancing security features and product performance.
- Identified and resolved critical vulnerabilities within the codebase, significantly improving overall security posture.
- Addressed complex customer escalations and designed custom software solutions to meet specific client needs.
- Played a key role in the major platform migration of Email Security Hardware Appliance from Platform-2 to Platform-5 across 7 variants, ensuring a smooth transition.
- Restored development environments for various products, facilitating improved development and testing processes.
- Analyzed and resolved issues across transport and data link layers of network protocols (TCP/IP, SMTP) to address customer challenges and improve system reliability.
- Effectively handled critical incidents, minimizing impact and ensuring business continuity.

Skills

- **Programming Languages:** Go (Golang), C, C++, Perl
- **Version Control:** Git, GitHub, Stash
- **Operating Systems:** Linux (Ubuntu, CentOS)
- **DevOps & Tools:** CI/CD, GitHub Actions
- **Networking:** TCP/IP, SMTP
- **Testing:** Manual Testing
- **Other:** Scripting, Problem Solving, Project Management, Debugging

Projects

- **Email Security Gateway (Barracuda):** Worked extensively on backend systems, focusing on improving performance and security, with in-depth experience in network protocols. Key contributions include building CI/CD from scratch, migrating firmware to Golang, identifying and fixing vulnerabilities, and developing new features.
- **Centralized Appliance Management Platform (Barracuda):** Developed a comprehensive platform for integrating and managing various Barracuda appliance products. This platform enabled centralized configuration changes (additions/deletions), provided real-time product health and system details, and integrated an AI-powered chatbot for log analysis to identify and analyze processing failures, offering intelligent insights.
- **Cloud Health Monitoring Service:** Developed a service to analyze company cloud resource health and a platform for managing and monitoring all utilized cloud resources.
- **SOCIAL DISTANCE DEVICE FOR THEATERS:** Developed a device to alarm individuals about social distancing measures in theaters without human intervention.
- **OXY-TREAT:** Designed a system for refining environmental air to provide pure oxygen based on customer requirements for public areas.

Professional Engagements & Recognition

- **Barracuda Cybersecurity Centre of Excellence:** Represented Barracuda Networks at the inauguration of the Cybersecurity Centre of Excellence at Basaveshwar Engineering College, fostering student engagement with cybersecurity careers, industry professionals, and emerging technologies.

Awards

- Employee of the Month (4 times) at Barracuda Networks
- Promoted to Software Engineer at Barracuda Networks
- Runner-up in company-wide Hackathon

Education

B.E. - Electronics & Communications Engineering | BEC, Bagalkot • Karnataka *August 2022*
