Bengaluru, Karnataka

Summary

Results-driven Software Engineer with over 2 years of experience in software development and testing. Proficient in Git and scripting languages including C, C++, and Go. Experienced in building CI/CD frameworks and skilled in diagnosing issues to implement effective solutions. Proven leadership in project management and collaboration with cross-functional teams, ensuring high quality and reliability. Strong communicator seeking a challenging role in a progressive organization to expand knowledge and contribute to growth.

Experience

Software Engineer

Barracuda Networks • KA, Bengaluru

09/2022 - Present

- Developed and enhanced CI/CD frameworks for firmware development, ensuring seamless deployment and full development lifecycle support.
 - Addressed customer escalations and designed custom software solutions to meet specific needs.
 - Migrated repositories from Stash to GitHub and established GitHub Actions for various projects.
 - Identified and resolved critical vulnerabilities within the codebase, improving overall security.
 - Contributed to significant code rewrites in Go and developed new features for the product.
 - Restored development environments for various products, facilitating improved development and testing processes.
 - Analyzed issues across transport and data link layers of protocols to understand customer challenges.
 - Played a key role in platform migration
 - Handled critical incidents effectively.
 - Major part of platform migration of the product.
-

Skills

C/C++, Git, Linux, CI/CD, Perl, Golang, Manual Testing, TCP/IP, Ubuntu, CentOS

Awards

Employee of the Month (4 times) at Barracuda Networks, Promoted to Software Engineer, Runner-up in company wide hackathon

Projects

SOCIAL DISTANCE DEVICE FOR THEATERS*

- This project mainly focuses to alarm the individual about the measures to be followed in social distancing without any human interference in theaters.

OXY-TREAT*

- Refining environmental air and allowing only pure oxygen based on the customers requirement therefore providing refreshing experience in public areas.

Email Security Gateway (Barracuda)

- Worked extensively on backend systems, focusing on improving performance of Email Security Gateway, and in-depth experience with network protocols such as TCP/IP and SMTP.
- Major hardware upgrade migrating Platform-2 to Platform-5 across 7 variants of Email Security Hardware Appliance
- Built CI/CD from scratch for seamless building of firmware and releases.
- Key role in migrating firmware from the old open-source code to private code Golang ensuring a smooth transition and enhancement of security features.
- Identifying major vulnerabilities and fixing them
- Developing features for newer firmware versions.
- Led Stash to GitHub repo migration
- Led cost optimization initiatives that reduced infrastructure for BAC product, improving operational efficiency.

* - College projects

Education

B.E - Electronics & Communications Engineering

BEC, Bagalkot • Karnataka

08/2022

Participated and won in quiz competitions, project exhibitions & hackathons conducted at college levels.
